PROJECTS

Crypto Tracer | *Smart India Hackathon 2026 (Team Project)* — **GitHub**

- Contributed to the frontend and UI design of a web-based tool that helps investigators trace stolen cryptocurrency, built for a Ministry of Home Affairs (I4C) problem statement at Smart India Hackathon 2026.
- Designed and built screens for the case dashboard, transaction flow graph and report views so investigators can follow the money trail in one place.
- Worked in a team using Git and GitHub; the project cleared all college-level rounds and was shortlisted for the final round.

URL Shortener | *Node.js, Express, PostgreSQL* — **In Progress**

- Building a full-stack web application that turns long URLs into short links and redirects visitors to the original URL.
- Designing REST APIs and a PostgreSQL schema to store original URLs, short codes, creation timestamps and click counts.

Personal Portfolio Website | *HTML5, CSS3*

- Built a responsive portfolio with semantic HTML5 and a Flexbox layout, custom themes, hover effects and a contact section.
- Organized styling with reusable CSS classes and clearly structured sections.
